

PROGRAM EDUCATIONAL OBJECTIVES

- PEO1 To provide opportunities for the students to gain knowledge and experience on the design and implementation of Real-time Embedded Systems and to undertake research in Embedded Systems and allied areas.
- PEO2 To provoke the students to exhibit Modeling, Design, Programming, and Optimization skills to meet industrial challenges in the field of Automotive Electronics, Robotics, Telecom, Consumer Electronics, and Industrial Process Control.
- PEO3 To develop leadership qualities in students with strong communication skills, competence to function effectively in multidisciplinary teams, capability to assess and relate engineering issues to environmental context.
- PEO4 To inculcate in the minds of the students ethical responsibility towards serving the society.
